

# NxGen Sale Manager Exchange Released

We have experienced some major delays in the Upgrade of our Sale Manager program to the new *NxGen* platform. Due to these unforeseen circumstances we have yet to get to the re-write of Sale Manager. We hope to accomplish this by early 2018. However to provide an interim solution for our Sale Manager customers we have created a bridge between *NxGen* on the new platform and Sale Manager 3.63 on the old platform. *NxGen* Sale Manager Exchange is that solution!

Sale Manager Exchange provides for a seamless transfer of data back and forth. As this is an interim solution until we get Sale Manager Updated, **there is no cost** to current Sale Manager Customers! It does still require that you run Sale Manager in a 32 bit compatible environment. Please follow this link to a guide for Computer Requirements and Compatibility:

<http://www.midwestmicro.com/docs/requirements.pdf>

Sale Manager Exchange is available from the "Extras" Menu when Cow Sense *NxGen* is keyed for that capability. Additional fields for storing data related to animal Sale Information are also made available in *NxGen*. These additional fields can be toggled ON from the Cow Sense Menu > Options > Data Field Settings > Sale.

A *NxGen* Guide is available for the Sale Manager Exchange. Please follow this link to the Cow Sense Information Center to review that document:

[http://www.cowsense.com/ng/docs/guides/ngg\\_009.pdf](http://www.cowsense.com/ng/docs/guides/ngg_009.pdf)

We will continue to provide product Technical Support to all Sale Manager Customers under the current Customer Service Policy until such time that the Sale Manager Upgrade is available. No further program modifications to Sale Manager 3.63 will be made as all development resources will be committed to migration to the *NxGen* platform

We thank you for your patience and understanding in the major undertaking to Upgrade Sale Manager. The *NxGen* **Sale Manager Exchange** is a very functional solution and provides your path to move forward with the Next Generation of Cow Sense products and services.
